

3000/3004

3000-GU / 3004-GU

The 3000 and 3004 fixtures come with satin nickel finished housing and cylinder shaped acrylic diffusers. The acrylic diffusers distribute the light output evenly, and act to soften the light to create a cozier atmosphere. With their thin, long shape and features, these fixtures are perfect for bathroom use. Installation of these fixtures is very easy, and they will add warmth to any residential space. The 3000 and 3004 fixtures are FCC certified, UL listed and Energy Star certified.
