

5003/5011

5003-GU/5011-GU

The 5003 and 5011 fixtures are full-sealed outdoor fixtures. They are perfect for backyard, pool, or decorative lighting. This fixture can hold one (1) or two (2) light bulbs at the same time, providing enough light for any purpose. There are rubber seals between the glass shell and the body, as well as a light sensor. Light sensors allow users to save more than half of the energy by simply turning off in the day time and turning on at night. Boasting durability, efficiency, and simple installation, these fixtures are a perfect solution for residential outdoor lighting. The 5003 and 5011 fixtures are FCC certified, UL listed and Energy Star certified.
