

5004/5012

5004-GU/5012-GU

The 5004 and 5012 fixtures are perfect lighting solutions for any outdoor usage. Rubber seals sit between the glass shell and the body, effectively preventing water or anything else from getting into the fixture. The unique horizontal shapes provide flexibility on installation. These fixtures also feature built-in light sensors, allowing users to save more than half of their energy. These products are energy saving, durable, and modern looking outdoor lamps, making them useful for any residential usage such as pool lighting, patio design, and storage light sources. The 5004 and 5012 fixtures are FCC certified, UL listed and Energy Star certified.
