

RTFK-STRIP

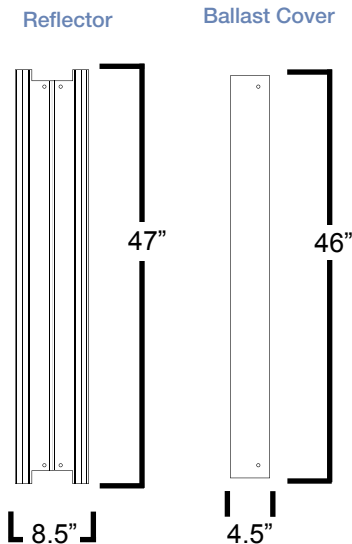

RTFK-STRIP

Our Retrofit kit is the perfect solution for converting 4" and 8" T12 into T8s. This retrofit kit uses the existing housing of the fixture and upgrades it to be more energy efficient. The T8 now has more color choices and a longer lamp life. By using this kit, the fixture can add reflectors and other new additions, such as an LED tube. Our universal socket plate can hold a single socket at one side, and double socket at the other side for easy changes depending on the user's preference or situational need. Our universal socket gives the user the options

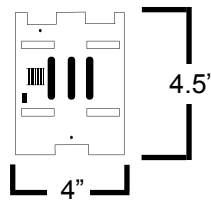

RTFK-STRIP

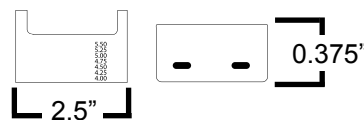

■ Dimensions
