

PARAB

PARAB

The PARAB series is our Parabolic Troffer line. The fixtures come equipped with an aluminum grill that provides both glare control, and optical control. The PARAB series is available in various sizes, allowing it to fit any regular ceiling tile. Featuring a black reveal, it creates a modern floating Louver, giving your workspace a contemporary look. The PARAB fixture comes with the option of including two (2), three (3), or four (4) lamps. Installation is easy, and can be done without any special tools due to the two convenient spring-locks on the louver window. The PARAB series is ETL listed and FCC certified.
