

## RLHB

Our RLHB fixture is not like most high bays in our industrial line; this fluorescent high bay is decorative, while still providing the same illumination as other high bays in our industrial line. This decorative fixture is the perfect solution to any open space with high ceilings such as offices, retail stores, or schools. The compact design saves space and makes installation easy. The lamps are protected by a louver baffle that could be easily removed to do maintenance on the lamps. The RLHB is UL listed and ETL certified.
